IJ6080

INKJET RECEIPT/VALIDATION PRINTER

**THE WORLD'S SMALLEST
RECEIPT/VALIDATION PRINTER!**

Addmaster's IJ6080 is specially designed for the high volume and wide variety of forms validated at the teller window. With a full-length drop-in slot and fast multi-line validation, the IJ6080 easily handles cut-form receipts, checks, cash tickets, deposit slips, batch headers, payment coupons, and more. It can even print on envelopes and legal size paper. And, while other printers limit validation to the right-most 3", the IJ6080's open slot gives you the flexibility to print across the width of the document.

Optional Automatic Form

Positioning offers software-controlled repeatability of printing on your forms. This feature – an Addmaster exclusive – allows you to control the exact location of print on the document.

With its quiet operation and high quality inkjet receipts, the Addmaster IJ6080 is ideal for the banking environment. Addmaster inkjet printers are American-made and have proven their reliability in banks for over a decade, with more than 190,000 installed in U.S. banks.
