

VERIFONE MX800 SERIES

MX800 Series

MX800 SERIES PRODUCTS

A part of VeriFone's unique MX Solutions offering, the MX800 Series devices are a consumer-facing family of products that help you gain a competitive advantage with extraordinary capabilities and a new way of interacting with your customers at the point of sale. Ideal for multi-lane retailers and specialty stores as well as for point-of-service environments such as retail banking, ticketing, or kiosks, these powerful devices can be a vital component in your customer experience plans and allows for improved operational efficiencies and a lower cost of ownership.

All MX800 Series devices are equipped with powerful processors, exceptionally sharp displays, and built to be extra durable. They share a common platform and run the same applications to give you the unequalled flexibility to mix and match units to meet specific store needs and budgets. Global-ready and secure, MX800 Series devices support smart card, magnetic stripe and contactless payments and comply with the latest security standards. They are PCI PED and EMV Level 1 and 2 approved.

MX870

Multimedia Impact. The MX870 merges full-motion video, a 65,000 color display, high quality digital sound and highly secure payments capabilities into a single, easy-to-use system. Going well beyond standard PIN pad technology, the PCI PED approved MX870 meets stringent security requirements for the payment industry while enabling retailers to express their brand, reinforce advertising or deliver cross-promotions right to their customers at the point-of-sale. That means users can now complete transactions at the highest and most reliable level possible, while optimizing their time in front of the MX870.

MX850

Picture Perfect. Designed for demanding multi-lane environments, the ultra-durable MX850 has a powerful payment processing engine, a convenient keypad for secure PIN entry, user-friendly, ATM-style prompt keys and an ultra-crisp color display...making it the clear choice for many retail environments. The PCI PED approved MX850 securely handles transactions in seconds, while also delivering a dazzling array of brand reinforcement, cross-promotional messages and even consumer disclosures directly to consumers.

VERIFONE MX800 SERIES

MX860

Peak Performance. As the newest member of the MX800 Series, the MX860 is as versatile as it is performance-oriented. An industry leading color display ideal for promotional and interactive customer applications is combined with a tactile keypad and large signature capture area to speed customers through lanes. The MX860 offers a wide screen, a tactile keypad and a large signature capture area speeds customers through lanes. A fast processor and ample memory make the MX860 especially well suited for high-volume locations. But, the MX860 delivers more than fast and secure payments. It features a large brilliant full-color display for implementing attention-getting promotions and a variety of other revenue generation and customer interaction solutions. Combined with the new MX800 Series printer and scanner, multiple connectivity options including Power over Ethernet, WiFi, USB and various serial interfaces—plus a secure browser platform—the MX860 puts a whole new world of payments and promotions capabilities at your fingertips.

MX830

Performance Plus. Designed for demanding multi-lane environments, the MX830 is a robust, consumer-facing payment system that makes quick work of even the most complex payment and value-added transactions. The MX830 is exceptionally durable and stands up to heavy-use environments. Keys are laser-etched to preserve letters and numbers. The touch screen uses specially hardened glass that resists scratching for a clear view over the life of the device. The non-mechanical stylus has no moving parts or electronics to fail. Plus, field-replaceable modules allow the addition of contactless payment or emerging technologies to preserve investments over time. A smart card reader is factory optional.
