

**Successful Outcomes Start  
with Superior Service Delivery**

**FlexForce certified project managers will  
help your business achieve new gains.**

## Flexible Solutions for All Your Service Delivery Needs

Do you have a list of initiatives a mile long that never seems to disappear? Could your team use a trusted hand in achieving time-sensitive deliverables? Or is there simply a task you just can't handle with your existing skillset? FlexForce by BLM Technologies can help your business overcome these challenges and more through cost effective, reliable service delivery and project management services. Whether tackling an upcoming move, performing a company-wide software upgrade or simply carrying the extra burden of unfinished projects, our team of experienced professionals will see your work through from start to finish, ensuring the job is done on time and within budget.

## Service Delivery Powered by FlexForce and BLM Technologies

### Project Management

Outsource time-consuming and costly projects to certified management professionals, freeing up your team to work within their core competencies.

### Installations

Expert installation protects your investment from day one by ensuring every facet of your hardware or IT technology has been properly assembled, connected and secured.

### Moves & Relocations

Reduce the stress of your move by having professionals relocate your office hardware and IT equipment, including services like: breakdown, packing, shipment, storage, unpacking, and installation.

### Software Implementation

Integrate software with streamlined support and implementation that accounts for your unique business needs.

### Software Upgrades

Upgrade your system and minimize disruption in your operations with professional support from experienced IT technicians.

### Digital Signage Deployment

Amplify your messaging, advertising and engagement with innovative digital signage installed by experts.

## Highly Qualified, Expert Service

BLM Technologies provides superior service to every client in our portfolio. Many of the nation's top brands trust BLM for their toughest IT challenges — and we love to deliver. BLM project managers are:

- Versed in a variety of industries
- Highly trained
- Professional
- Friendly
- Able to integrate seamlessly
- And more!

We are committed to providing trusted, reliable service to your business every single day.

## 50 States. Thousands of Technicians.

What's the secret to fast, superior service? Location, location, location! We've established hubs in all 50 states staffed with highly trained technicians and project management professionals proficient in today's key technologies. Your service delivery needs are our first priority and we have thousands of qualified personnel ready to support your critical IT needs.

## Do I Need Service Delivery or Project Support?

Determining your service delivery and project support needs is simple. Here are some questions our clients ask when building the right package for their business.

1. Do I have any upcoming projects that require a certain skill or expertise that is outside of my current team's capabilities?
2. Do I have an upcoming move that involves expensive assets or complicated relocation tasks?
3. Do I have any major equipment installations scheduled for our company?
4. Does our company software need an upgrade or overhaul?
5. Am I considering supplementing our advertising or engagement strategy with a digital signage solution?
6. Are there tasks I could delegate to a trusted support partner to free up essential personnel and critical hours for core business needs?
7. Are my in-house personnel capable of completing these tasks and their day-to-day work?
